

*The Corporation of the District of Central Saanich*

**NOTICE**

**To: The Resident**

**From: Engineering and Public Works**

**Subject: Installation of a Backflow Device (Dual Check Valve) at the Property Line**

---

The Provincial Government has mandated that the water purveyors undertake appropriate measures to protect the quality of potable water to your property.

Therefore, a Backflow Device (dual check valve) will be installed, in the meter box at your property line, starting \_\_\_\_\_ in your area. The Backflow Device will ensure that water flows to the house but does not backflow through the valve to the District's water supply system. This installation is required to preserve the integrity of water quality in the Central Saanich water system.

If you have any questions or concerns in respect of your home water system, please contact the Building Department at 250-544-4217. Relevant information in this regard is attached.

If you have any questions or concerns in respect of the Backflow Device at the property line, please contact the Public Works Coordinator of Public Works at 250-544-4224 (ext. 222).

Please note that the District of Central Saanich is not responsible for any damage to your property as a result of the installation of the Backflow Device at your property.

David McAllister, PEng., MSc., MBA  
Director of Engineering & Public Works
