

*The Corporation of the  
District of Central Saanich*

## **NOTICE – Water Main Flushing**

The Water Department advises residents that we will be flushing water mains throughout the months of January to May. Consult the “Advisories & News” quick link on the District’s web site at <http://www.centralsaanich.ca/residents/news.htm> to view the flushing schedule for specific zones. Temporary discoloration of water and/or low water pressures may occur. This discoloration is not a health hazard. To clear your water lines, simply turn on your cold water tap in your laundry tub until the water is clear. Upon request, we will provide advance warning of flushing in your vicinity for those persons with special requirements for water clarity. Contact the Central Saanich Municipal Yard at 544-4224, ext. 221. The District cannot accept any responsibility for damages caused by low water pressure or the use of discoloured water. Therefore, we advise consumers to be on the alert for reduced water pressure and/or temporary discoloration of water.

Norm Doerksen  
Superintendent of Public Works
